**Amendments to the Specification:**

Please replace the Abstract with the below paragraph.

A method and apparatus for ~~is provided to sample~~ sampling formation fluid includes drawing formation ~~Formation fluid is drawn~~ from the subterranean formation into the downhole tool and ~~collected~~ collecting the formation fluid in a sample chamber. An exit flow line is operatively connected to the sample chamber for selectively removing a contaminated and/or clean portion of the formation fluid from the sample chamber whereby contamination is removed from the sample chamber. For example, a clean portion of the formation fluid may be passed to another sample chamber for collection, or a contaminated portion may be dumped into the borehole.
